Sheheryar Ahmed

Sr. Software Developer

Rawalpindi, Pakistan | sheheryar.pk2@gmail.com | +92 (311) 587-9518 | **Linkedin** | **Github**

Results-driven Backend Developer with 5+ years of experience designing and implementing scalable, high-performance APIs and microservices. Expert in Python ecosystem with deep proficiency in Django and FastAPI frameworks. Proven track record of architecting complex multi-tenant systems, integrating third-party payment solutions, and deploying robust applications on cloud platforms. Specialized in RESTful and GraphQL API design, database optimization, and building secure authentication systems. Passionate about clean code, system architecture, and delivering solutions that drive business value.

TECHNICAL EXPERIENCE

Languages & Frameworks: Python, Django, Django Rest Framework, FastAPI, HTML, CSS, Javascript, ReactJs
API Development: RESTful APIs, GraphQL, WebSockets
Databases: PostgreSQL, MySQL, ORM, Database Design, Query Optimization, Multi-tenant Architecture
Security & Auth: Authentication & Authorization, JWT, OAuth, Role-based Access Control
Architecture: Microservices, Modular System Design, Scalable Architecture Patterns
Cloud & DevOps: Docker, Azure, Heroku, Vercel, DNS Management, CI/CD, Containerization
Tools & Practices: Git, GitHub, API Testing, Code Review, Agile Methodologies

PROFESSIONAL EXPERIENCE

Sr. Back-end Developer (Python/Django/FastAPI) @ *XIOTS LTD*

January 2021 – Present // Blackburn, United Kingdom

⇒ Architected scalable microservices for **iClerk** leveraging **Django, Django Rest Framework, Django-tenants, and FastAPI** to implement a secure multi-tenant architecture with complete data isolation and access control.
⇒ Led iClerk development team in delivering high-quality, performant software solutions while consistently meeting project timelines and technical requirements.
⇒ Developed scalable RESTful and **GraphQL** APIs serving 50K+ daily requests using **Django Rest Framework and FastAPI**, reducing response times by 40%.
⇒ Integrated payment gateways, including **Stripe and Wise APIs**, processing £1M+ in monthly transactions with 99.9% uptime.
⇒ Deployed and managed production applications on **Azure and Heroku** with automated **CI/CD pipelines**, achieving zero-downtime deployments.
⇒ Contributed to the architectural design of **Cabtain taxi dispatch** platform using **Django, FastAPI, Redis caching, OpenStreetMap integration, JWT authentication, and PubNub** messaging, ensuring secure authorization, real-time data synchronization, and high-performance operations.
⇒ Optimized **PostgreSQL** database queries and indexing strategies, improving application performance by 50%.
⇒ Managed DNS configurations and cloud deployments on Vercel and Azure, ensuring high availability.

Full-Stack Developer @ *KhasTech Solutions*

August 2020 – December 2020 // Islamabad, Pakistan

⇒ Contributed to an **online learning platform** using the Django framework.
⇒ Developed **role-based authentication and authorization** systems, ensuring secure access control
⇒ Designed and normalized database schemas for complex business logic in PostgreSQL

KEY PROJECTS

Multi-Tenant Modular Business Management System

Architected enterprise-level multi-tenant platform with modular components, including invoicing, cab booking, CRM, task management, restaurant management system with inventory control, and voucher systems with complete data isolation. Built a restaurant module featuring multiple EPOS integrations, waiter applications, and a real-time dashboard displaying live table booking status and availability.
Technologies: Django Rest Framework, FastAPI, WebSockets, FCM, Stripe, Wise Bank API, iCabbi & Autocab API/Webhook Integrations, PostgreSQL, Microservices Architecture, Azure, Multi-tenant Database Design, Real-time Data Sync

Taxi Dispatch Management System

Working on a multi-tenant taxi dispatch system managing bookings, addresses, vehicle assignments, driver management, dynamic tariff calculations, and zone-based routing with WebSocket integration.
Technologies: Django, FastAPI, Redis, PubNub, JWT Authentication, Access control, Stripe, OpenStreetMaps, PostgreSQL, SQLAlchemy

Genmark - Generator Set Tracking Portal

Created a comprehensive portal for genset monitoring with subscription management, real-time tracking, user authorization, and a reporting dashboard.
Technologies: Django Rest Framework, Websockets, JWT Authentication, PostgreSQL, Role-based Access Control, Azure

Multi-Vendor E-Commerce System for Restaurants

Built a comprehensive marketplace platform enabling multiple restaurant vendors to manage menus, orders, and customer relationships through a unified API backend.
Technologies: Django Rest Framework, Django Oscar, Django Channels, Stripe API, JWT Authentication, PostgreSQL

Online Learning Platform

Contributed to a virtual learning and meeting platform for schools and offices. Implemented a role-based access system enabling students to attend virtual classes and official teams to conduct online meetings with integrated video conferencing capabilities.
Technologies: Django, BigBlueButton Integration, Role-based Access Control

Visitor Counting & Identification System (Final Year Project)

Developed a facial recognition-based system for automated visitor counting and identification with a backend API for data processing and analytics.
Technologies: Python, FastAPI, OpenCV, PostgreSQL, Machine Learning Integration

EDUCATION

Foundation University Rawalpindi Campus

2016 – 2020 // Rawalpindi, Pakistan

Bachelor of Science in Computer Science (CGPA 3.72/4)
